Comments: I just wanted to let you know that I do not agree with the use of Yucca Mountain as a nuclear fuel & high-level radioactive waste repository. In light of the current events in our country, I would feel less than safe with such products being shipped near my home. The thoughts of it being stored near my children were earthquake activity occurs frightens me. I do not want to end up on a TV news magazine telling yet another story about how the government denied that any harm would come to a community and years later people are dying as a result. Please treat this case as if your children's beds are on top of that mountain because mine are. Don't become a product of GroupThink.
